

# SDG REPORT

## Rajamangala University of Technology Phra Nakhon 2022

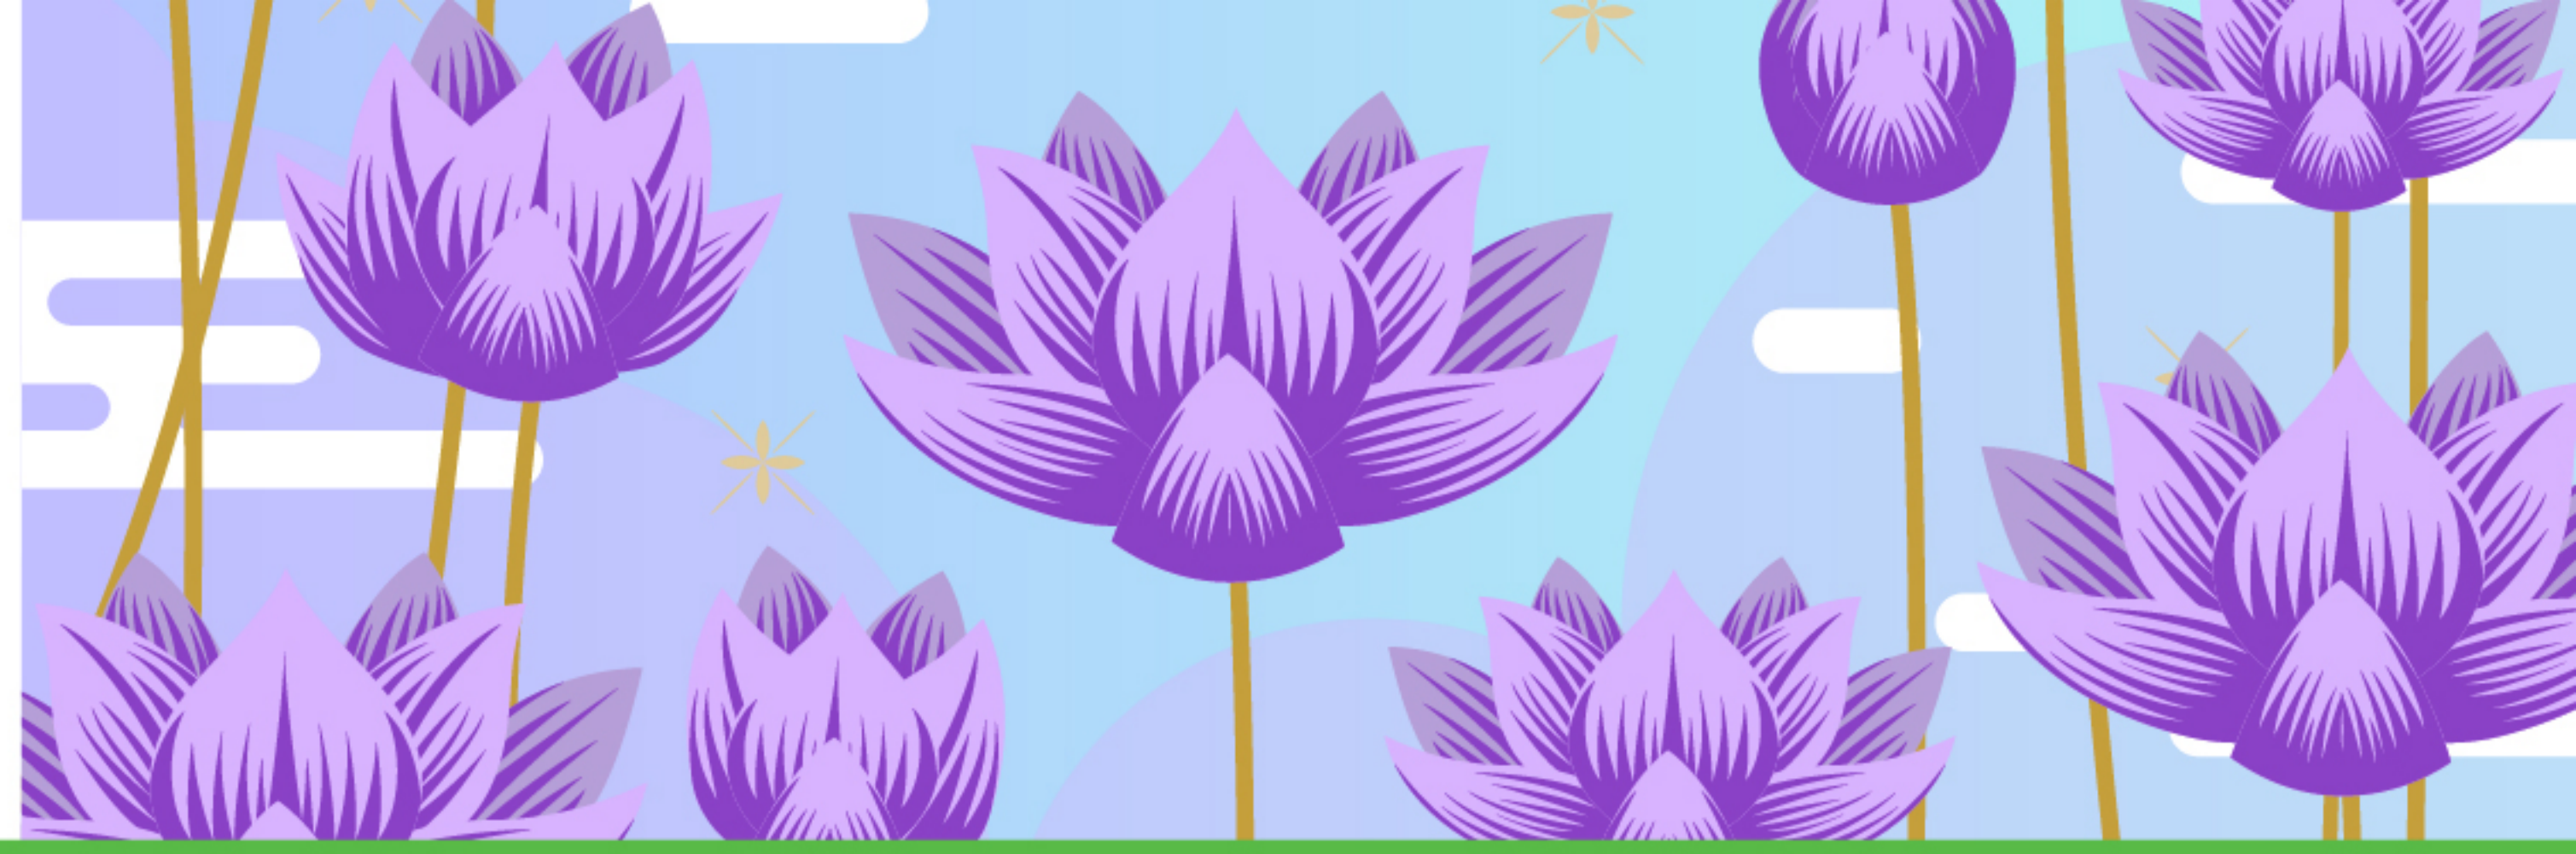

■ Creation of a learning center for the project related to the conservation of plant genetic resources.

## Life on Land

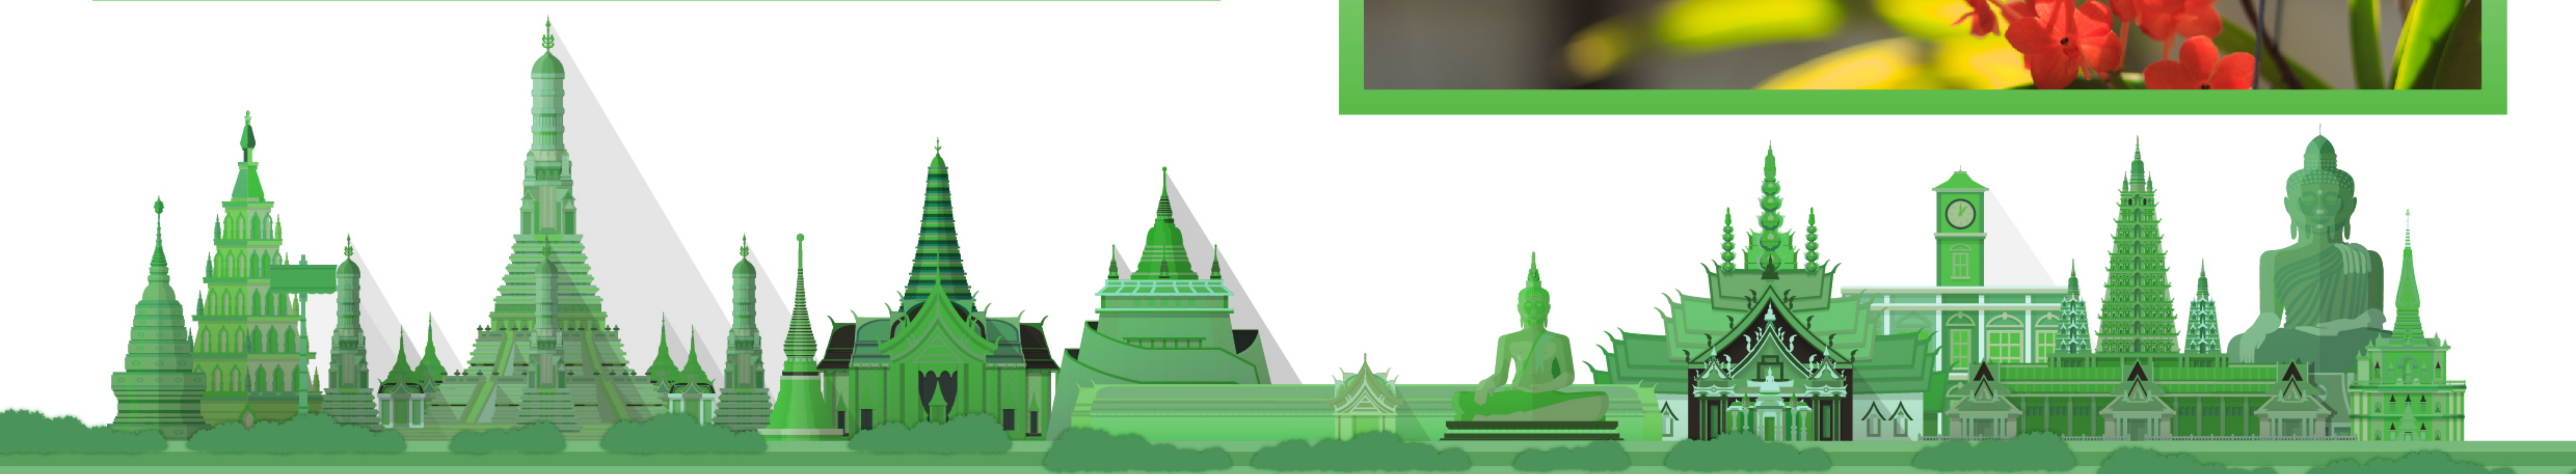

The creation of a learning center for the project related to the conservation of plant genetic resources.

The President of Rajamangala University of Technology Phra Nakhon, Bangkok, chaired a meeting to discuss the guidelines for jointly supporting the royal initiative to preserve plant genetic resources in the donated area of 29 rai 15 square wah located in the Jomthong district of Bangkok. This honor was bestowed by Dr. Piyarat Prinyapong Charoentra, Deputy Head of the Office of the Royal Project for the Conservation of Plant Genetic Resources, as part of the royal initiative of Her Majesty Queen Sirikit of Thailand, along with Ms. Ponrada Suwannanont, who donated the land.

During the meeting, various agenda items were considered, including how to make use of the donated land in the Jomthong district of Bangkok, in line with the royal initiative. The discussions also included the establishment of a coordination center between the Office of the Royal Project for the Conservation of Plant Genetic Resources and Rajamangala University of Technology Phra Nakhon, as well as the creation of a learning center for the project related to the conservation of plant genetic resources initiated by Her Majesty Queen Sirikit.

In addition, the project also contributes to expanding green spaces and reducing greenhouse gas emissions, which can help mitigate the effects of climate change.

In the initial phase of the project, students and the team participated in the program to conserve plant species within the Chom Thong area in compliance with the policy.
