RMUTP offers cooperative education and professional internship programs.

RMUTP offers cooperative education and professional internship programs to provide students with practical work experience in a systematic and efficient manner. Cooperative education emphasizes working in businesses or organizations that collaborate with the university. Students are presented with job opportunities in advance, and they can choose to work in positions related to their field of study during regular academic terms.

Professional internships require students to work in professional settings relevant to their field of study for a minimum of 360 hours. The internships include performance evaluation and monitoring. Additionally, the university offers "Teacher Professional Experience" programs.

All 9 faculties conduct orientation and cooperative education introduction programs for students.
